Professional Summary

Electrical and Computer Engineering graduate with experience in IoT systems, system administration, networking, and full-stack development. Skilled in developing AI-powered, cloud-connected, and embedded solutions, with a passion for applying artificial intelligence to solve real-world challenges.

TECHNICAL SKILLS

Programming

Python, Java, C++, PHP,
Dart, JavaScript, TypeScript, SQL

Frameworks

React, Next.js, Flutter

Cloud & Tools:

AWS, MATLAB, Packet Tracer, Docker,
Git

PROJECTS

Miiltoo Knowledge Companion

- Led a team of five developers to build an AI-powered educational chatbot and quiz generation platform for Ethiopian Grade 12 students.
- Designed features that enabled students to receive personalized learning support and automatically generated quizzes.
- Ranked as an A2SV Generative AI Hackathon Finalist among 3,700+ participants from 50+ African countries.

SmartRide

- Developed an IoT vehicle safety system using ESP32, MQ-3 alcohol sensor, GPS module, accelerometer, Firebase Realtime Database....
- Implemented real-time alcohol detection, accident monitoring, GPS tracking, and remote vehicle status updates through a cloud-connected dashboard.
- Designed embedded software to prevent vehicle ignition when alcohol levels exceeded a predefined threshold, improving driver safety.
- Built a web dashboard for monitoring vehicle data and emergency alerts in real time.

PROFESSIONAL EXPERIENCE

System Administrator, Mindware Computer Network

09/2025 – 04/2026

- Configured internal server components, including hardware integration and containerized environments
- Led a team in building and deploying server systems from scratch, ensuring reliability.
- Managed and monitored server operations, maintaining system stability and minimizing downtime

Network Engineering Intern, Commercial Bank of Ethiopia(CBE)

07/2024 – 09/2024

- Led a team in analyzing and documenting the network infrastructure of the head office and 3 branches
- Designed a scalable network model including 12 departments and ATMs, improving data routing efficiency by 35%
- Implemented structured cabling solutions that reduced maintenance needs

Programming & Robotics Intern, Yenetta Code

06/2023 – 10/2023

- Mentored 20+ students in basic programming and robotics using Arduino and Scratch
- Supported the creation of a web-based learning platform used by over 100 students weekly
- Helped design course modules that improved student engagement

EDUCATION

Bachelor of Science in Electrical and computer Engineering,

Addis Ababa Science and Technology University (Graduated 2025)

TVET level 5

Akaki Polytechnic College

AWARDS

A2SV Generative AI Hackathon for Africa Finalist, Africa to Silicon Valley (A2SV)

01/09/2023

- Awarded a medal for being a finalist in the A2SV Generative AI Hackathon for Africa.

University Dean Award, Addis Ababa Science and Technology University (AASTU)

01/01/2021

- Received the University's Exceptional Academic Performance Award for attaining a GPA over 3.75
